EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

In claim 26 line 3, "cases" was replaced with --causes--.

Allowable Subject Matter

3. Claims 1-3 and 13-33 are allowed.

4. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or fairly suggest an accumulation range input device to set a predetermined accumulation parameter range to be used with respect to a subject parameter of interest, an accumulation unit to use data from a part attribute database storage to accumulate, for each selected parameter value of a plurality of selected parameter values, and accumulation total corresponding to ones of the plural candidate parts having actual parameters falling within the predetermined accumulation range as measured from the selected parameter value, so as to determine a plurality of accumulation totals corresponding respectively to the plurality of selected parameter

values, and a standard parts judging unit to compare ones of the plurality of accumulation totals to each other, to select which candidate part is selected as the standard part, in combination with the remaining features and elements of the claimed invention.

The claims have been allowed only in light of the teachings in the specification that serve to support the independent claims (e.g., page 9 line 3 – page 12 line 25, Fig. 6, and Fig. 7). For example, the accumulation unit is explained in page 10, particularly lines 21-25. Here, it is explained, that when part X and part Y are judged to be near each other for each of the different part parameters such as “volume” and “surface area”, then the quantity of production of parts Y is added to the accumulated quantity of parts X and the accumulated quantity of production of parts X is updated.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
